Now that I have cluttered up your e-mail system, I thought I would confirm that I just sent you 5 e-mails with various PDF documents attached – if there is something you did not get, let me know and I will find some other way to send.

Happy reading.

Subject: Engineering performance standards

Here are DRAFTS of the engineering performance standards reports. As we have discussed, these are works in progress, so you will see sections that are still blank, values with place holders such as “XX” and “TBD”, and perhaps even typos here and there.

We are sharing these drafts now, so that you can get a head start familiarizing yourself with the issues. We will be sharing another draft of these reports at the end of December (possibly early January) with you and our group of experts in preparation for the January 26 meeting with those experts to discuss and further develop the performance standards.

These files are big, so I will be sending them in several e-mails.

This first e-mail transmits the main engineering performance standard report, associated figures, Attachment C and Attachment D.
